PROFESSIONAL SUMMARY

Data analyst with a BSc in International Relations and practical experience building analytical projects across energy, environmental, workplace safety, industrial operations and business datasets. Skilled in SQL, Power BI, Excel, BigQuery and data visualization, with a strong interest in turning operational data into clear business insights. Currently developing deeper capability in advanced SQL, analytics engineering and data engineering.

TECHNICAL SKILLS

Data Analysis: SQL, data cleaning, exploratory analysis, statistical analysis, KPI development,

reporting BI & Visualization: Power BI, DAX, Excel, Tableau, dashboard design, data storytelling

Databases & Cloud: BigQuery, PostgreSQL, MySQL, SQL Server, DBeaver

Programming: Python, Pandas, NumPy, Matplotlib

Analytics Engineering: Data modelling, views, transformations; currently developing dbt and advanced SQL

Other: ESG analytics, operations analytics, risk analysis, supply-chain analytics, research

SELECTED PROJECTS

U.S. Airline Operations Analysis | SQL + Power BI — Analysed airline operational data to identify performance patterns, delays and operational trends; developed an executive-style Power BI dashboard with KPI cards and interactive visuals.

NOSDRA Oil Spill Analysis | BigQuery + SQL + Power BI — Cleaned and transformed Nigerian oil-spill records, analysed spill volume and recovery patterns, and developed a Power BI dashboard to communicate environmental and operational insights.

Nigeria Gas Flare Analysis | BigQuery + SQL — Built analytical queries around gas-flaring activity, operators, locations and emissions-related indicators, including ranking and regulatory-risk metrics.

OSHA Workplace Safety Risk Analysis | SQL + Power BI — Analysed workplace safety data to identify risk patterns and benchmark incidents across industries and operational categories.

Industrial Predictive Maintenance Analysis | SQL + BigQuery — Explored equipment and maintenance data to identify failure patterns and operational indicators relevant to predictive maintenance.

Superstore & HR Analytics | Excel + Power BI — Performed sales, profitability and workforce analysis using spreadsheets, pivot-based analysis, KPIs and dashboard visualisation.

EXPERIENCE

Data Science Intern — Decode Labs | Remote | Jul 2026 – Aug 2026

Participated in a structured data science internship focused on practical analytical and technical skills. Worked with data analysis concepts, Python-based workflows and problem-solving approaches applicable to business datasets. Built practical experience connecting data preparation, analysis and communication of insights.

EDUCATION

BSc International Relations — [Godfrey Okoye University] | Nigeria | 2025

Academic foundation in research, policy analysis, international affairs and structured analytical writing.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Microsoft Power BI Data Analyst (PL-300) — preparation / certification pathway

Google Data Analytics Professional Certificate

Google AI Professional Certificate

CAREER INTERESTS

Data Analytics • Business Intelligence • Operations Analytics • ESG & Sustainability Analytics • Energy & Industrial Analytics
• Supply Chain Analytics • Risk Analytics • Analytics Engineering

ADDITIONAL

Available for internship, graduate trainee, entry-level and project-based analytical opportunities. Portfolio includes SQL, BigQuery, Power BI and environmental/industrial analytics projects.
